Disclaimer

This presentation of information relating to BioPharma Credit PLC ("BPCR") is confidential and is intended solely for the information and exclusive use of the person to whom it has been provided. It is not to be reproduced, or transmitted, in whole or in part, to third parties. This presentation was prepared by Pharmakon Advisors, LP ("Pharmakon"), the investment manager of BPCR. This presentation is being furnished for informational purposes only, and does not constitute an offer to sell, or a solicitation of an offer to buy an interest in any current or future investment vehicle or account managed or advised by Pharmakon. This presentation is subject to a more complete description and does not contain all of the information necessary to make an investment decision, including, but not limited to, the risks, fees and details of the documentation of BPCR. Any such offering or solicitation of interests in BPCR will only be made pursuant to and in accordance with the terms and conditions set forth in the Prospectus, including any additional disclosures and any supplements thereto, and other ancillary offering and governing documents of BPCR (collectively, the "Offering Documents"), all of which, including especially the section of the Prospectus entitled "Risk Factors", must be read in their entirety in order to obtain more complete information on BPCR. No offer to purchase interests in BPCR will be made or accepted prior to receipt and review by an offeree of these Offering Documents and the completion of all appropriate documentation, and before making any investment decision, investors are advised to consult with their tax, financial and legal advisors. All investors must meet suitability requirements set forth in the Offering Documents.

This presentation and the information herein may not be reproduced (in whole or in part), distributed or transmitted to any other person without the prior written consent of Pharmakon. Notwithstanding the foregoing, you may disclose to any and all persons, without limitation of any kind, the U.S. federal tax treatment and tax structure of (i) BPCR and (ii) any of its transactions, and all materials of any kind (including opinions or other tax analyses) that are provided to you relating to such tax treatment and tax structure, it being understood that "tax treatment" and "tax structure" do not include the name or the identifying information of (A) BPCR or (B) the parties to a transaction.

Past or targeted performance is not necessarily indicative of future results and there can be no assurance that BPCR will achieve comparable results or that BPCR will be able to implement its strategy or achieve its investment objectives, including its targeted return. The portfolio composition of BPCR can differ from the portfolios of Private Fund II, Private Fund III, and Private Fund IV, and for this reason, the track records of those prior funds may not be as relevant to a consideration of BPCR.

Potential debt investments described herein as "backed" by pharmaceutical products may not benefit from a security interest in these products or the proceeds of their sales.

Statements contained in this document that are not historical facts are based on current expectations, estimates, projections, opinions and/or beliefs of Pharmakon. Such statements involve known and unknown risks, uncertainties and other factors, and undue reliance should not be placed thereon. Certain information contained herein constitutes "forward-looking statements," which can be identified by the use of forward-looking terminology such as "may," "will," "planned," "should," "expect," "anticipate," "project," "estimate," "intend," "continue," "potential," "believe," "hypothetical," "theoretical", or other similar terms, the negatives thereof or other variations thereon or comparable terminology. Due to various risks and uncertainties, actual events or results or the actual performance of BPCR can differ materially from those reflected or contemplated in such forward-looking statements. All are subject to various factors, including, but not limited to general and local economic conditions, changing levels of competition within certain industries and markets, changes in interest rates, changes in legislation or regulation, and other economic, competitive, governmental, regulatory and technological factors affecting the investor's operations that could cause actual results to differ materially from projected results.

Projected returns included herein are hypothetical, forward-looking statements involving known and unknown risks, uncertainties and assumptions. The actual performance results of BPCR (including with respect to any individual investments), can be materially different from any projections. No representation is made that the historic performance shown in this presentation is any assurance or guarantee of future performance. BPCR could incur losses as well as generate gains. Projection performance figures are calculated based on estimated yields of underlying portfolio investments. Such projections were made by Pharmakon using Pharmakon's own sales forecasts taking into account a number of factors including, (vi) the product specification of the marketer of underlying products, (ii) historical product sales, (iii) therapeutic use and efficacy of a product, (iv) anticipated product competition, (v) importance of product to its marketer, (vi) geographic region in which a product is marketed and (vii) Wall Street analyst projections. Such projections are subject to a wide range of market factors which, individually or in the aggregate, may substantially impact the accuracy of the Pharmakon's projections, including (i) adverse market conditions affecting product pricing or the financial strength of the product's marketer, (ii) challenges to a product's patent or other intellectual property rights, (iii) adverse determinations relating to the product's safety or use, (iv) adverse regulatory determinations; (v) interruptions or delays in product manufacturing; and (vi) insolvency of a company impacting such company's ability to repay its obligations. If any of the foregoing events were to occur, such an event could have a material adverse effect on the company's ability to make future payments of interest and principal, which could result in an extended maturity and duration, or potentially a substantial or full loss of capital. Any projections of returns on debt instruments are made using an assumption that borrowers w

Given these uncertainties, prospective investors are cautioned not to place undue reliance on such forward-looking statements.

Unless otherwise indicated, "gross IRR" with respect to each Private Fund means an aggregate, annual, compounded, as applicable, internal rate of return, calculated on the basis of historical capital inflows and outflows related to the relevant fund or a particular investment, without taking into account the impact of management fees, incentive compensation, taxes, or transaction and organizational costs and expenses. As used herein, "net IRR" with respect to each Private Fund means an aggregate, annual, compounded, as applicable, internal rate of return, calculated on the basis of realized capital inflows and outflows for all investments of the relevant entity, taking into account the impact of management fees and incentive compensation at the highest rates applicable to an investor in the relevant entity, taxes, transactional, organizational, and other costs and expenses. As used herein, "net IRR" with respect to each individual investment means an aggregate, annual, compounded, as applicable to an investor in the relevant entity, taxes, transactional, organizational, and other costs and expenses. As used herein, "net IRR" with respect to each individual investment means an aggregate, annual, compounded, as applicable, internal rate of return, calculated on the basis of historical capital inflows and outflows for ealized capital inflows and outflows for ealized investment means an aggregate, annual, compounded, as applicable, internal rate of return, calculated on the basis of historical capital inflows and outflows for each investment means an aggregate, annual, compounded, as applicable, internal rate of return, calculated on the basis of historical capital inflows and outflows for each investment means an aggregate, annual, compounded, as applicable i

Unless otherwise indicated, "gross multiple on invested capital" or "gross MOIC" with respect to each Private Fund means the sum of historical capital inflows related to the relevant fund, without taking into account the impact of management fees, incentive compensation, taxes, or transaction and organizational costs and expenses, divided by historical capital outflows. As used herein, "net multiple on invested capital" or "net MOIC" with respect to each Private Fund means the sum of historical capital inflows for all investments of the relevant entity, taking into account the impact of management fees and incentive compensation at the highest rates applicable to an investor in the relevant entity, taxes, transactional, organizational, and other costs and expenses, divided by historical capital outflows. As used herein, "net multiple on invested capital" or "net MOIC" with respect to each individual investment means the sum of historical inflows for each investment, taking into account, for investments multiple on invested to each individual investment from Private Fund II, Private Fund III, P

Certain information contained herein concerning economic or industry trends and performance estimates are based on or derived from information provided by independent third-party sources. Pharmakon believes that such information is accurate and that the sources from which it has been obtained are reliable. Pharmakon cannot guarantee the accuracy of such information, however, and has not independently verified the information or the assumptions on which such information is based. While Pharmakon's valuations of unrealized investments are based on assumptions that Pharmakon believes are reasonable under the circumstances, the actual realized returns on unrealized investment will depend on, among other factors (including but not limited to any factors as set forth above), future operating results, the value of the assets and market conditions at the time of disposition, legal and contractual restrictions on transfer that may limit liquidity, any related transaction costs and the timing and manner of sale, all of which may differ from the assumptions on which the valuations contained herein are based. Please contact Pharmakon if you would limit according to the models, including the estimates and assumptions, additional explanation of the risks and limitations of using target returns or additional information about the assumptions behind any hypotheticals (and the inherent limitations of any such hypotheticals).

In view of the complexities of the tax laws and since no attempt is made herein to mention all of the tax considerations that should be taken into account in evaluating a potential investment, a person considering investing should consult their own tax adviser in order to understand fully the federal, state, local and foreign tax consequences of such investment to their particular situation. No representation is made as to the tax consequences of the operations of the investors.

All trademarks and trade names used herein are registered to the respective companies identified herein. Any company logos, trademarks and/or trade names used herein are not intended to and do not suggest, imply or indicate any kind of endorsement by or with respect to any such respective companies.

Investment Opportunity – Summary

Investments in Approved Life Sciences Products – No Clinical Trial or Approval Risk

- Debt investments backed by life sciences products (drugs, devices and diagnostics)
- Collateral value assigned only to approved products in their approved indications and territories

Life Science R&D Spending

The Life Sciences Debt Market is an Underserved, Large and Growing Opportunity

- Large capital needs, private sector companies spent ~\$250bn in R&D during 2021¹
- Worldwide \$1.4tn industry, having grown at a 7% CAGR for the past 20 years²
- Industry dynamics create new debt investment opportunities

Pharmakon Advisors, LP

An Experienced Investment Manager with a Strong Track Record

- ▶ \$7.5bn committed across 50 investments supported by life sciences products
- Four private funds are fully realized and generated a 10.3% unlevered weighted average annualized net IRR³
- Currently manages a private fund with \$1.8 billion in commitments

BioPharma Credit Targets Strong Risk-Adjusted Returns

- ▶ Invests in loans, predominantly secured, in companies with approved, commercial stage products
- ► Target total net return on NAV of 8-9% per annum over the medium term⁴
- Currently paying and will continue to target US\$0.07 annual dividend plus a variable special dividend paid annually

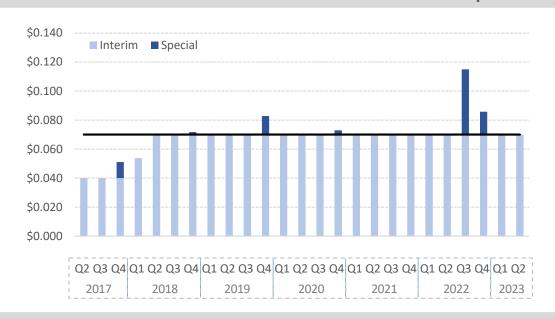

^{1.} Source: Visible Alpha. 2. Source: IQVIA

^{3.} Weighted average net IRR represents the net IRRs of Private Funds I, II, III and IV, determined in accordance with the methodology described in the legend on page 1 and weighted by the total amount of invested capital for each fund. Past performance is not indicative of future results.

^{4.} These are targets and not profit forecasts. They are based on estimates of Pharmakon and are subject to change depending on the material risks and market changes. There can be no assurance that these targets will be met. Past performance is not an indication of future performance.

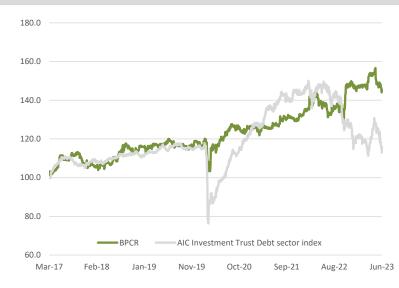

BPCR has generated consistent returns since IPO¹

BPCR annualized² dividends per share in US\$

 Interim dividend has consistently met the annualized \$0.070 target for almost five years

Price and NAV TR performance³ since IPO

- A consistent dividend has led to a steady increase in NAV total return
- BPCR's predictable cash flows has allowed it to enjoy relatively low volatility
- 1. Past performance is not an indication of future performance.
- 2. (Interim Dividend x 4) + Special Dividend, if applicable. Past performance is not an indication of future performance
- 3. Source: Pharmakon. Past performance is not an indication of future performance

Investment track record of mostly singles and doubles – Emphasis on consistency and reduced risk

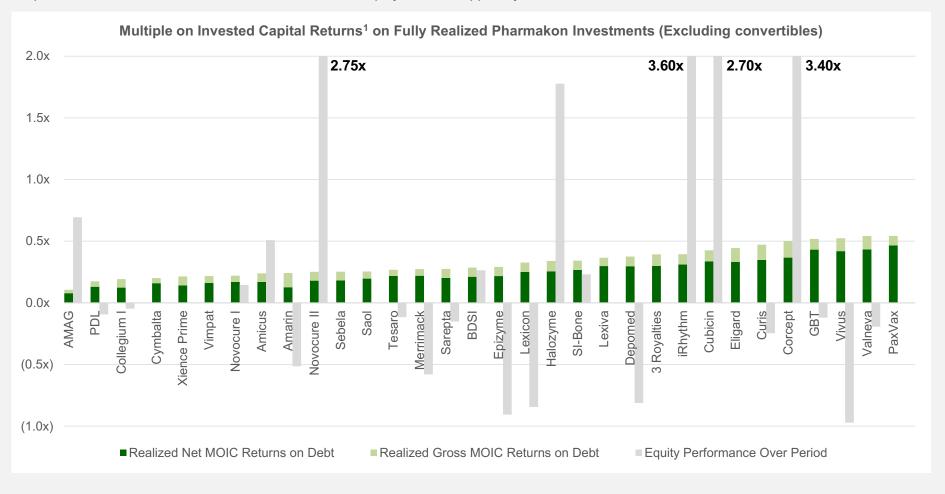

^{1.} As of 30 June 2023. Past performance is not indicative of future results. Please refer to the page 29 for additional information. As set forth herein the Realized Gross and Net IRR for each individual investment is determined in accordance with the methodology described in the legend on page 1. The Realized Net IRR for each realized investment in an active fund is calculated by applying a percentage reduction to the respective Realized Gross IRR based on the average percentage reduction from the realized gross IRR and realized net IRR from all previously realized investments from prior closed private funds, in each case in accordance with the methodology described in the legend on page 1. Pharmakon believes this methodology is the appropriate approach to derive an approximate realized net IRR for realized investments in currently active funds. Excludes equity and convertible investments.

The right structure / LTV helps generate attractive returns on debt irrespective of equity performance

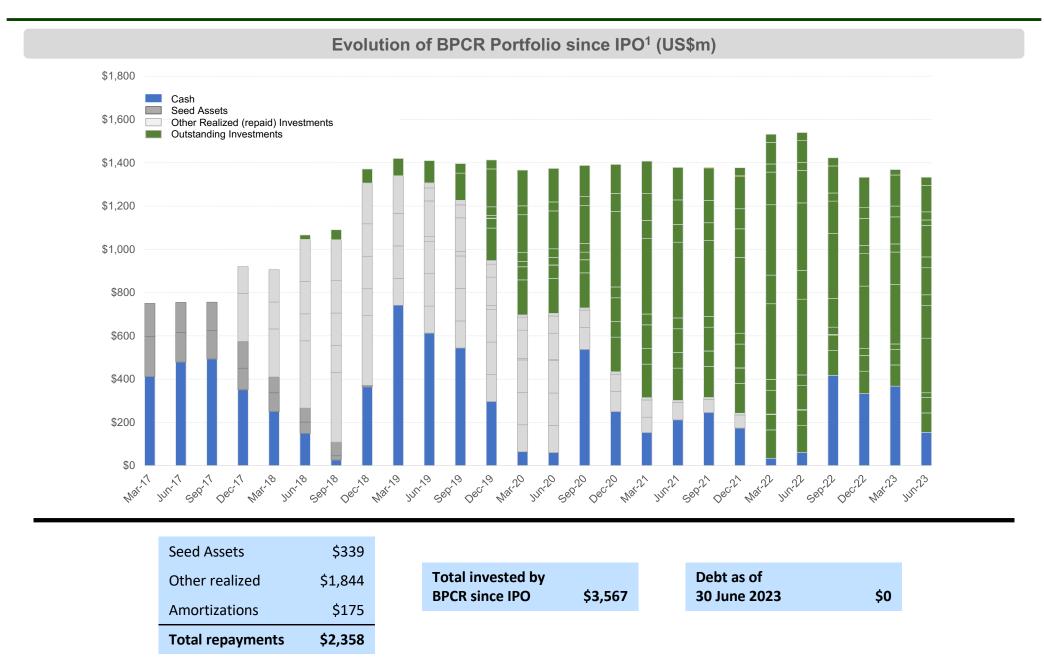

Life Sciences Debt Investments were less risky and are generally exposed to less volatility than an equity investment in the corresponding issuer

- The chart below shows the gross and net multiple on invested capital¹ of all past Pharmakon investments that have been fully realized
- While the realized returns of debt underperformed the equity in a few cases, as would be expected, the right structuring allowed for downside protection in debt investments even in cases where equity values dropped by > 90%

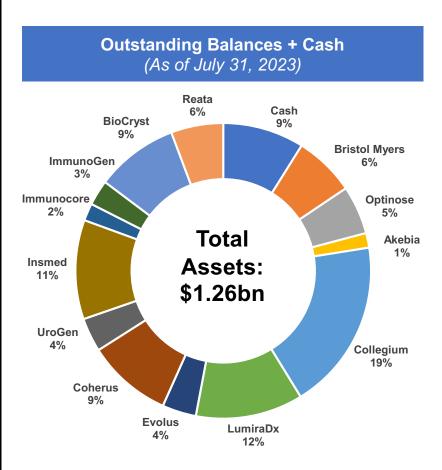

1. As of 30 June 2023. Past performance is not indicative of future results. Please refer to the page 29 for additional information. As set forth herein the Realized Gross MOIC and Net MOIC for each individual investment is determined in accordance with the methodology described in the legend on page 1. The Realized Net MOIC for each realized investment in an active fund is calculated by applying a percentage reduction to the respective Realized Gross MOIC based on the average percentage reduction from the Realized Gross MOIC and Realized Net MOIC from all previously realized investments from prior closed private funds, in each case in accordance with the methodology described in the legend on page 1. Pharmakon believes this methodology is the appropriate approach to derive an approximate net MOIC or those realized investments in currently active funds. Excludes equity and convertible investments

New investments have allowed BPCR to broaden its diversification and deploy cash from capital raises and loan repayments

BPCR currently has ~\$1.3bn invested across 13 transactions

Reata	\$275.0	11.3%	50%	\$137.5	\$62.5	\$76.8 ²	\$75.0
Total	\$3,102.6			\$1,526.6	\$1,311.6	\$1,148.4	\$205.5

^{1.} Projected IRR to Maturity represents Pharmakon's estimate of gross IRR with respect to the relevant investment, assuming no early prepayment and that reference rates are equal to or lower than relevant floors. This hypothetical performance has many inherent limitations and there is no representation that the investment will or is likely to achieve its projected IRR. The performance is subject to all of the risks for forward-looking statements referenced on the disclaimers page 1 and will vary depending on the assumptions used.

^{2.} Fair value increased based on the 28 July 2023 acquisition announcement.

BPCR's portfolio is primarily composed of senior secured loans to listed companies

Investment:

The Gross Yield¹ of the Portfolio has Benefited from Higher Reference Rates and an Increase in Floating Rate Investments

^{1.} Gross yield is calculated as the weighted average effective coupon across the various investments held by BPCR at the end of each calendar quarter. The 3Q2023 estimated Gross Yield is calculated with reference to the 3mSOFR rate as of 1 July 2023. Past performance is not indicative of future results.

^{2.} Floating vs. fixed calculations exclude cash which earns a floating return. PF1Q23 include the Immunogen and BioCryst transactions. Past performance is not indicative of future results.

Current Valuation of BPCR Portfolio¹ vs. Theoretical Value Using Bond Market Rates²

- The majority of BPCR's investments are private loans that do not have an observable market value and are classified as "Level 3 Investments". The fair values of the unlisted investments are determined principally by reference to discounted cash flows using the "As Reported" discount rates in the first column in the table below as of 30 June 2023.
- For illustrative and comparison purposes only, the table below also includes calculations of the value of the individual loans and portfolio if discounted at the specified index market rates for the different bond market levels of risk/ratings².

Value of Investments as of 30 June 2023 (As Reported and Under Different Discount Rates)

^{1.} As of 30 June 2023. Past performance is not indicative of future results. As set forth herein, Gross IRR, Net IRR, Gross MOIC and Net MOIC for each individual investment is determined in accordance with the methodology described in the legend on page 1. The Net IRR for each realized investment in an active fund is calculated by applying a percentage reduction to the respective Gross IRR based on the average percentage reduction from the gross IRR and net IRR from all previously realized investments from prior closed private funds, in each case in accordance with the methodology described in the legend on page 1. The Net MOIC for each realized investment in an active fund is calculated by applying a percentage reduction to the respective Gross MOIC based on the average percentage reduction from the gross MOIC and net MOIC from all previously realized investments from prior closed private funds, in each case in accordance with the methodology described in the legend on page 1. Pharmakon believes this methodology is the appropriate approach to derive the approximate net IRR and net MOIC for realized investments in currently active funds. Excludes equity and convertible investments.
